(54) RECEPTION AND DELIVERY SYSTEM

(57) Abstract:

PROBLEM TO BE SOLVED: To enable a receiver to receive information articles, etc., which are delivered aperiodically at user's convenience.

SOLUTION: This system is provided with an ordering means 5 and an input means 6 which enable a receiver to set and specify convenient conditions for aperiodically received information according to information displayed on a display means 4. The time management, information management, and convenience of the receiver are therefore improved and unnecessary distribution and delivery on a server group are also reducible.
